

**Introducing Cem EZ™ - One Cement To Rule Them All**

Carlsbad, CA – (August 18, 2017) – Zest Dental Solutions announced today that it is expanding the Danville Product Portfolio with the introduction of Cem EZ – a new adhesive resin cement.

Confidence, efficiency, esthetics and value are attributes clinicians will experience with the new Cem EZ Adhesive Resin Cement. Utilizing the innovative, patent-pending IntelliTek™ Technology, chemists worked with everyday clinicians developing a new cement that provides exceptional bond strength, long-term color stability, and universal compatibility with modern, more acidic adhesive systems.

Cem EZ is formulated to provide:

- Excellent adhesion to the enamel and dentin tooth structure, and a wide variety of restorative materials.
- Demonstrated protection against microleakage\*.
- Efficiency - for some procedures, such as Zirconia, only one adhesive (Prelude One™), and the cement shade of choice is required.
- Easy clean-up with an ideal working viscosity and a simple tack cure procedure.
- Optimum flexibility with widespread adhesive compatibility, as well as the 7<sup>th</sup> generation Prelude One Adhesive System.
- The same level of esthetics found in many of the leading resin cements, without having to pay a premium price.
- Three shades: Translucent, Warm, and White Opaque
