

**ZEST Anchors Introduces A Healing Cap For The Popular
LOCATOR® Overdenture Implant (LODI) System**

Escondido, CA – (January 13, 2015) – ZEST Anchors, the global leader in end-to-end solutions for the treatment of edentulous patients expands the popular LODI System by offering a Healing Cap for delayed loading protocols.

Understanding that your edentulous patients have unique and individual needs is at the core of new product development for ZEST Anchors. With the introduction of the Healing Cap for the LODI System, clinicians can now offer a variety of treatment protocols for delayed or immediate loading, in all bone types. The new LODI Healing Cap is a smooth, non-engaging cap, available for 2.4 and 2.9mm diameter LODI Implants, available in 3 and 4mm cuff heights and is ideal during healing.

The LOCATOR Overdenture Implant (LODI) System has received an overwhelmingly positive response since its commercial release by ZEST Anchors in late 2012. The LODI System represents a unique opportunity for clinicians to offer a trusted treatment alternative to their edentulous patients. This is due to the unique scenarios the edentulous patient faces, which consist of anatomical limitations, the unwillingness or inability to endure an invasive bone grafting procedure or financial limitations. To these patients an affordable and trusted solution is attractive. The LODI System, incorporating narrow diameter implants with a detachable LOCATOR Attachment is an ideal solution for these patients and can be an opportunity for revenue growth for clinician's practices.

About ZEST Anchors, LLC

ZEST Anchors is a global leader in the manufacturing and distribution of dental solutions for the treatment of edentulous patients. For more than 40 years, ZEST Anchors has led the way in the overdenture market, receiving worldwide acclaim for pioneering the pivoting and self-aligning design of the LOCATOR Attachment System. Interface compatible with more than 350 implant products, LOCATOR is globally distributed in more than 45 countries. ZEST Anchors continues to build on its solid foundation and commitment to its customers by consistently introducing new product innovations, giving clinicians the tools to provide world-class overdenture therapy to their patients. Two such product introductions: the LOCATOR Overdenture Implant (LODI) System – the first of its kind narrow diameter implant system with a detachable LOCATOR Attachment. And, CHAIRSIDE® Attachment Processing Material designed for ease of use and predictability when processing denture caps and other attachment components into overdentures. ZEST Anchors is located in Escondido, California and has global distribution through OEM implant companies and distributor networks.
